Courses offered

- ❖ Dialysis Therapist
- ❖ Biomedical Instrumentation

In process to get Affiliation from Healthcare Sector Skill Council

Objective

- As technology advances and better investigative and treatment options are introduced, the need for professionals equipped to handle newer diagnostic modalities are on the rise.
- The ever changing & ever expanding horizon of the health care sector demands formal training programmes in all its allied areas.
- The diagnostics sector, today is witnessing a tremendous growth in terms of volume and sophistication. With increasing advances and super specialization, the scope for tomorrow's technologists does not remain limited to just routine tests. Advanced complex instrumentation & equipment require technocrats not only to operate but also to care & maintain them as well.
- The students thus trained in the technological aspects of medical care with a good scientific foundation will be in a position to competently assist the Physician or Surgeon, especially in high-tech medical procedures to cater to the health care industry globally.

Career Prospectus

Well trained technocrats with a strong scientific foundation make Medical Technology a challenging and rewarding career. The demand for professionals who can provide diagnostic and therapeutic service has been growing at a much faster pace than the number being trained every year.

Students can pick up global careers in

- Medical Technology industry
- Medical equipment companies
- Homecare industry
- Medical imaging industry
- Dialysis center & services
